

About Me

My name is Joe Bostock, I am an A-level student at Cleeve Secondary School and Sixth Form Centre of Excellence. I am currently studying Maths, French and Computer Science. Once I finish school in the summer of 2023, I would like to pursue a career in software development, by first completing a degree-level apprenticeship in this field. I really enjoy writing the code and creating things from scratch and then seeing my work come to life and viewing what I have created. I first grew to love computers when I was very little, I have always had access to one in one form or another, whether that being a play station or an actual desktop computer. I recently discovered my love for programming when I started my coursework for computer science where I created a Virtual Assistant.

Experience

11/2021 → Now:

Sales Assistant – The Original Factory Shop (Part-Time):

During my time working here, I have been able to build important skills such as:

- Confidence
- Teamwork
- Leadership responsibilities.

08/2022:

Work experience at Raytheon for a week:

I worked with people and furthered my knowledge of many different things such as: Linux, teamwork and how a day-to-day work life looks in a tech company.

Education

GCSEs:

I have a GCSE at grade 7 in: Computer Science, Maths, Biology, Chemistry, Physics and Geography.

I have a GCSE at grade 6 in: French, English Literature and English Language.

A-Levels:

I am predicted to get:

- A in Computer Science
- C in French
- C in Maths

Skills

Python – I have previously created a Virtual Assistant that works using machine learning.

HTML – I can create functional websites that are easy to navigate.

CSS – I can make these websites look modern and professional with animations formatting and more.

Leadership – I used to run a cyber club for younger people, where I would demonstrate and teach them cool tech things from programming drones to Wi-Fi hacking and more.

Responsibility – For this cyber club I had to take responsibility for creating lessons and delivering them.

Teamwork – I have previously worked on group projects where team work is vital.

Ability to learn new things – I am eager to grow my skillset and love to learn new things such as new programming languages or concepts.
